

# Shawn Witemyre

543 Lummus Road Cumming, Georgia 30040

**Phone:** (678)-327-6743 | **Email:** switemyre@comcast.net

**Skills:** React, Angular, Vue, TypeScript, JavaScript, Storybook, Vitest, Cypress, HTML, CSS, Git

---

## #Professional Experience

### **T-Mobile** - *Associate Software Engineer*

January 2026 – Present: Atlanta, Georgia / Hybrid

- On-boarded onto an engineering team responsible for modernizing internal web applications from legacy AngularJS to React
- Participating in agile ceremonies and technical discussions related to applications modernization efforts

### **Brad's Deals** - *Junior Front-End Developer*

January 2023 – February 2025: Chicago, Illinois / Remote

- Contributed to the migration of a high-traffic e-commerce platform from Ruby on Rails to Vue.js, improving performance and scalability, and achieving ~30% faster load times while sustaining ~200% traffic spikes during peak holiday traffic
- Built and documented a reusable, responsive Vue component library in Storybook, collaborating with product and design to ensure consistent UX, mobile optimization, and cross-browser compatibility, accelerating development cycles by ~30%
- Refactored and modularized legacy code to reduce technical debt and improve maintainability, decreasing long-term engineering effort and support burden by ~15%

### **Fiserv** - *Technical Analyst*

June 2021 – December 2022: Alpharetta, Georgia / Hybrid

- Built and documented a reusable Angular component library in Storybook used across enterprise applications, standardizing UI patterns and accelerating development
- Performed comprehensive accessibility testing on UI components and full applications, ensuring WCAG 2.2 compliance and improving product usability for users with assistive technologies

### **Tensar** - *Junior CRM Developer*

August 2019 – June 2021: Alpharetta, Georgia / Hybrid

- Supported the migration of on-prem Microsoft Dynamics to the cloud, improving platform responsiveness by ~30% while minimizing disruption for business users
  - Built interactive JavaScript dashboards to visualize CRM data, increasing user engagement by ~30% through enhanced front-end functionality and usability
  - Conducted penetration and load testing on a React-based mobile and web application using OWASP ZAP and Apache JMeter, reducing load times by ~50% and ensuring high performance and security under peak usage
- 

## #Education

### **University of North Georgia** / Bachelor's Degree Computer Science

Dahlonega, Georgia

### **University of North Georgia** / Bachelor's Degree Finance

Dahlonega, Georgia

### **Senior Project**

- Conducted experiment and authored an IEEE-style paper: "Hijacking Wireless Communications using WiFi Pineapple NANO as a Rogue Access point"
- Submitted for publication, KSU Proceedings on Cybersecurity Education, Research and Practice, October 2018, <https://digitalcommons.kennesaw.edu/ccerp/2018/practice/5/>
