

Shawn Witemyre

Cumming, Georgia

Phone: (678) 327-6743 | **Email:** switemyre@comcast.net

Skills: React, Angular, Vue, TypeScript, JavaScript, Storybook, Vitest, Cypress, HTML, CSS, Git

Professional Experience

T-Mobile - Associate Software Engineer

January 2026 – Present: Atlanta, Georgia / Hybrid

- Owned the full modernization of a legacy AngularJS application, migrating front-end views and controllers to React while preserving existing Spring Boot back-end APIs
- Optimized Spring Boot data queries serving an ECharts visualization, reducing payload size from 27MB to 7MB

Brad's Deals - Junior Front-End Developer

January 2023 – February 2025: Chicago, Illinois / Remote

- Drove front-end delivery on the migration of a high-traffic e-commerce platform from Ruby on Rails to Vue.js, improving performance and scalability, and achieving ~30% faster load times while sustaining ~200% traffic spikes during peak holiday traffic
- Built and documented a reusable, responsive Vue component library in Storybook, collaborating with product and design to ensure consistent UX, mobile optimization, and cross-browser compatibility, accelerating development cycles by ~30%
- Refactored and modularized legacy code to reduce technical debt and improve maintainability, decreasing long-term engineering effort and support burden by ~15%

Fiserv - Technical Analyst

June 2021 – December 2022: Alpharetta, Georgia / Hybrid

- Architected and delivered an enterprise Angular component library adopted across multiple product teams, establishing UI standards at scale
- Performed comprehensive accessibility testing on UI components and full applications, ensuring WCAG 2.2 compliance and improving product usability for users with assistive technologies

Tensor - Junior CRM Developer

August 2019 – June 2021: Alpharetta, Georgia / Hybrid

- Executed the migration of on-prem Microsoft Dynamics to the cloud, improving platform responsiveness by ~30% while minimizing disruption for business users
 - Built interactive JavaScript dashboards to visualize CRM data, increasing user engagement by ~30% through enhanced front-end functionality and usability
 - Conducted penetration and load testing on a React-based mobile and web application using OWASP ZAP and Apache JMeter, reducing load times by ~50% and ensuring high performance and security under peak usage
-

Education

University of North Georgia / Bachelor's Degree Computer Science

Dahlonega, Georgia

University of North Georgia / Bachelor's Degree Finance

Dahlonega, Georgia

Senior Project

- Conducted experiment and authored an IEEE-style paper: "Hijacking Wireless Communications using WiFi Pineapple NANO as a Rogue Access point"
- Submitted for publication, KSU Proceedings on Cybersecurity Education, Research and Practice, October 2018, <https://digitalcommons.kennesaw.edu/ccerp/2018/practice/5/>
